

verno®

Copper
Zinc
Manganese

An effective way to
apply micronutrients

Verno Product Range

Verno makes it simple to apply the micronutrients required for optimal plant growth.

Choose from Copper, Zinc and Manganese formulations that ensure prolonged micronutrient availability to the plant.

Verno is suitable for all crop types.

Verno is formulated as uniform, micro granules that are easy to measure. These granules disperse rapidly in water. When added to water, the result is a fine suspension of microscopic, one micron particles that can be used for foliar or pop-up application.

	ANALYSIS		
	Copper as Cuprous Oxide	Zinc as Zinc Oxide	Manganese as Manganese Carbonate
Verno Copper + Zinc	300g/kg	300g/kg	-
Verno Copper	750g/kg	-	-
Verno Zinc	-	600g/kg	-
Verno Manganese	-	-	340g/kg
Verno Trio	150g/kg	150g/kg	160g/kg

Versatile Application

- Foliar, boomspray, aerial or orchard sprayer.
- Pop-up with seed and/or pesticide.
- Down the tube mixed with UAN at seeding.
- Suitable as soil drench when transplanting.
- All Verno products are compatible with each other and can be blended to achieve the right balance of micronutrients.

Why using **Verno** makes sense

1.

Proven Results

Verno has many years of success across a wide range of crops. Tanuki has crop performance data in Australia since 2013.

2.

Cost Effective

Verno is a high analysis and high purity product. As a result, Verno can be applied at relatively low rates per hectare.

Typical usage rates are 100 to 250 grams per hectare.

3.

Crop Safety

Verno formulations are safe to apply to crop foliage at the suggested use rates. In furrow applications with seed are also crop safe at suggested use rates.

4.

Compatibility

All Verno products are compatible with each other and can be blended to achieve the right balance of micronutrients.

The products are also compatible with a wide range of fungicides, insecticides, herbicides and fertilisers when the spray solution is above pH6.0.

5.

Rain Fast

Verno has excellent adherence to the plant surface in wet and windy weather conditions, due to the small particle size of the formulation. This ensures a constant supply of available nutrient over an extended period

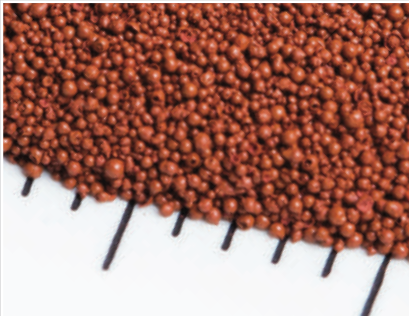

6.

Certified Organic

Verno Micronutrients are certified for organic production.

Using Verno is easy

The unique Verno micro-granular formulation makes it simple to use.

Verno granules

- Verno micro granules are easy to measure and handle with low dust.
- The granules disperse rapidly and completely in water with no suspension issues.

Easy to measure

- Verno is packaged in plastic pails that are easy to handle and transport.
- The product formulation is stable and can be stored from one season to the next.

Disperses rapidly

To prepare Verno for application, fill the spray tank with water to the $\frac{3}{4}$ level. Then add the required quantity of Verno granules to the water with continuous agitation prior to adding any other suitable mix partners.

Product Packaging

- Packed in weather resistant plastic pails.
- Straightforward inventory management.
- The plastic pails are easy to count and have colour coded lids.
- There are sixty four pails to a pallet.
